HOLMS

ATTACHMENTS

Attachments for clean,
safe and accessible roads and cities.

Holms Attachments, the right choice since 1927.

1 RELIABILITY

When you choose Holms you choose an attachment that is designed and manufactured in Sweden to extremely high standards of quality. This means you've chosen a durable attachment that will be used year after year in the toughest applications.

2 SUSTAINABILITY

Our organization as well as our products are saturated by low environmental impact from manufacturing and throughout the products life cycle.

- Increased productivity
- Good profitability
- Long life

3 DESIGN

Our products are thoughtfully designed with the user in mind. We incorporate details that make your job easier; both to operate and to maintain the equipment. These details increase your efficiency and promote longer life to increase the return on your investment.

4 SIMPLICITY

Our product is easy to manufacture, order and use. No adjustments, just attach and operate.

- Easy to adapt for different carriers
- Fast deliveries

SWEEPING ATTACHMENTS:

Holms sweeping attachments are designed to offer the operator maximum control. The roller brush's unique suspension provides you with an attachment that follows the ground perfectly. You'll also find a number of clever functions that save time and simplify your work.

Holms Pick-up Sweeper PH

When you need superior performance.

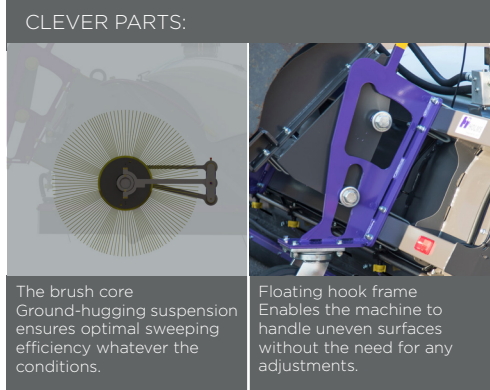

Holms Pick-up Sweeper PH is our largest pick-up sweeper for loaders. Thanks to its unique suspended design, only the brush maintains contact with the ground for better surface cleaning and decreased damages. The sweeper's brush is driven by two direct-acting motors to insure maximum utilization of the loader hydraulics for ideal operating speed at all times. It's available in three widths: 7'3", 8'2" and 9'10".

Holms Pick-up Sweeper PL

A low-profile pickup sweeper to maximize your utility.

The Holms Pick-up Sweeper PL is a flexible sweeper for use with skidsteers, compact loaders and tractors. The compact design features good visibility to keep the job site safe and protect your investment. The innovative floating hook frame allows the sweeper to follow the terrain without much operator adjustment. It's available in four widths: 4'11", 6'1", 7'1" and 8'2".

SWEEPING ATTACHMENTS:

Holms Angle Sweeper SL

Standard duty sweeper that gets the job done.

The Holms Angle Sweeper SL is a versatile sweeping attachment for skidsteers and smaller loaders. The Sweeper has the same quality design and long list of features as our larger sweepers but with a smaller 2'3" diameter brush. This provides you with a value product that is ready for tough conditions. The Sweeper is standard with manual angling but you can choose to optimize your investment with options like hydraulic angling, a dust control water system and a splash guard. Available in four different widths: 6'7", 7'3", 8'2" and 9'2".

Holms Angle Sweeper SH

General purpose sweeping for high performance needs.

The Holms Angle Sweeper SH is a more robust design for work with higher speeds, more difficult jobs and varied surfaces. The sweeper features a larger 3 foot diameter brush for high performance sweeping. The suspended design with down pressure indicator insures a proper sweeping technique to increase brush life and terrain contouring. Many options are available. The Holms Angle Sweeper SH is available in three widths: 8'2", 9'10" and 11'6".

Holms Angle Sweeper SP

A heavy duty sweeper for superior performance.

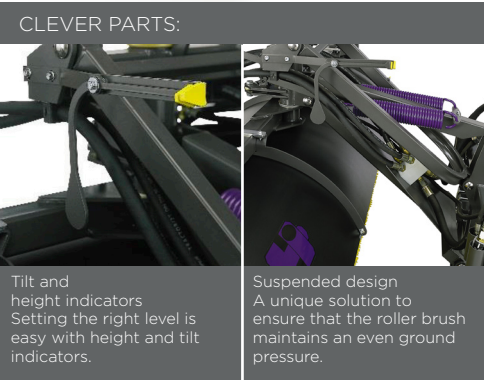

The Holms Angle Sweeper SP is an extremely sturdy sweeper for industrial sweeping using larger loaders. The sweeper is driven by two heavy duty direct-acting hydraulic motors. It connects to the loader's attachment bracket like our other models making changing attachments quick and easy. The sweeper comes standard with larger gauge brushes to handle the most stubborn sweeping jobs. It's available in three widths: 8'2", 9'10" and 11'6".

RECOMMENDED OPTIONS:

Dust control
Our rear mounted spray bar is protected and mists the brush not the ground.

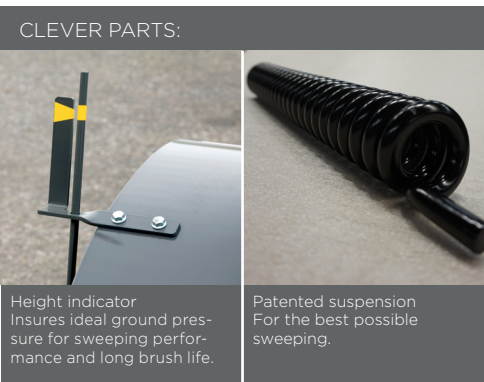

Spray Guard
Protect the surroundings from flying debris with this guard.

CLEVER PARTS:

Tilt and height indicators
Setting the right level is easy with height and tilt indicators.

Suspended design
A unique solution to ensure that the roller brush maintains an even ground pressure.

CLEVER PARTS:

Height indicator
Insures ideal ground pressure for sweeping performance and long brush life.

Patented suspension
For the best possible sweeping.

Holms Sweeper SC

Sweeper for excavators and special machines.

Holms Sweeper SC is an compact excavator sweeper designed for sweeping places that are difficult to access. Sweeping roofs, walls and uncovering sensitive utilities are examples of how the Holms sweeper SC gets put to use. It can be used with rotating couplers to maximize the efficiency of your investment. The Holms Sweeper SC is available in three widths: 3'3", 4'11" and 6'7".

Holms Brush HB

A simple design for cleaning up on any job.

Our push broom is adapted for use on forks and excavators. The Holms Brush HB requires no hydraulics and provides you with an inexpensive sweeping tool to take with you on every job. It's a clever design with no moving parts. The brush cartridges easily slide in and out when it's time to change them. The brush is available in many sizes and with rotating coupler adapters.

RECOMMENDED OPTIONS:

Splash guard
Additional protection against splashes for areas where splashing dirt is undesirable.

RECOMMENDED OPTIONS:

Excavator mount
Forklift mount is included in the standard model, the excavator mount is optional.

Holms Weed Brush WBE

A weed brush for excavators. Perfect for cleaning bike paths, parks and public spaces.

The Holms weed brush is perfect for those public spaces and bike paths that needs to be cleaned fast and effective. No need for herbicides or drawn out work efforts in order to keep the paths safe and clean from weed or other small debris.

The Holms Weed Brush for excavators is one of our latest products from Holms Attachments. Designed and developed from decades of experience and knowledge of keeping our roads and cities clean and safe. With simplicity in design and focus on reliability the Holms Weed Brush is another product from Holms that maintains and exceeds the high standard our customers are used to.

HOLMS WEED BRUSH WBE	WBE
Height	2'7"
Length	3'7"
Width	3'7"
Brush diameter, standard	2'9"
Weight, standard design (lb)	330
Attachment interfaces	S40, S45, S50, S60
Recommended brush rpm	80 - 250 rpm
Recommended oil flow (min/max) US Gal	5/16

- CONSIDER
- Other brushed are available upon request
 - Height may vary depending on configuration
 - Length may vary depending on configuration
 - Width may vary depending on configuration
 - Weight may vary depending on configuration
 - Recommended brush rpm depends on actual sweeping conditions

Holms Duo DL

An angle sweeper and pick-up sweeper all in one.

The Holms Duo is a service sweeper that transforms from an angle sweeper into a pick-up sweeper. Designed for skidsteers and smaller loaders.

The Holms Duo DL is an uniquely versatile sweeper that can be operated as a pickup sweeper and an angle broom; simply disconnect the container. This product is designed for skidsteers and smaller loaders with an emphasis on flexibility. When you don't know what the job might call for the Holms Duo DL can manage it all. The Duo DL is available in three widths.

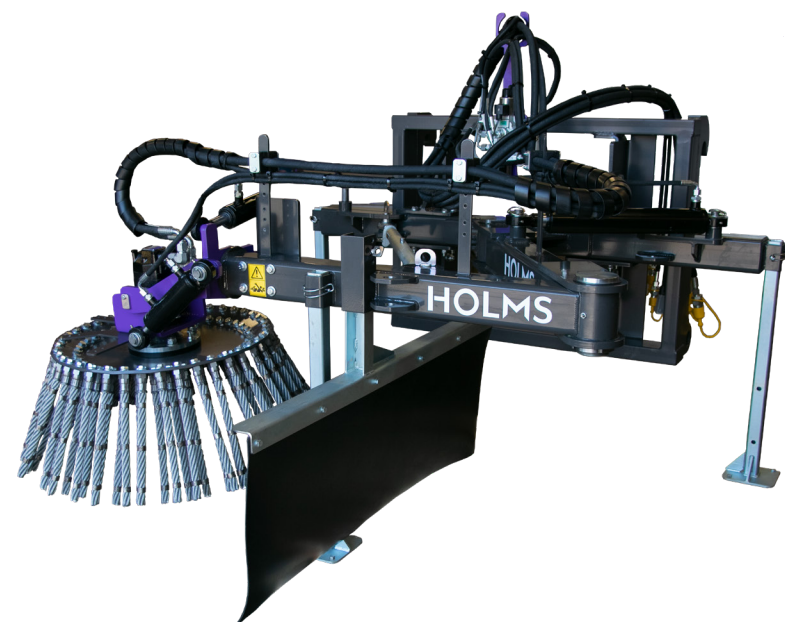

HOLMS SWEEPER DUO DL	DL150	DL185	DL215
Working width	4'11"	6'1"	7'1"
Max width, incl side/gutter brush	5'7"	6'9"	7'8"
Water tank capacity (US Gal)	26	26	26
Bucket capacity, gross volume	0,33 yd ³	0,4 yd ³	0,45 yd ³
Weight, Angle Sweeper excl. attachment bracket (lb)	948	970	1003
Weight, fully equipped (lb)	1609	1653	1709
Brush diameter	1'12"	1'12"	1'12"
Recommended oil flow (min/max) (US Gal)	8/16	8/16	8/16

- OPTIONS AND ACCESSORIES
- Hydraulic angling
 - Splash guard
 - Radio control
 - Electrohydraulic angling. Only available with radio control
 - Support wheel, front
 - Sprinkler system
 - Bucket
 - Full-flow block hydraulic system

All weights are approximate.
Attachment weight excludes hooks.

Holms Weed Brush WBL

A weed brush for loaders and tractors.

The Holms weed brush is perfect for thoose public spaces and bike paths that needs to be cleaned fast and effective.

No need for herbicides or drawn out work efforts in order to keep the paths safe and clean from weed or other small debris. The latest product in Holms versatile product portfolio is our Holms WBL. A hydraulically driven weed brush for front mounting on tool carriers and multifunction vehicles. Perfect for cleaning walkways, cycle paths, roadssides, gutters and parking lots. Can be equipped with water tank. With the Holms WBL it is possible to sweep both to the right and left side. All functions are controlled from the cab via a control panel. The Holms WBL comes in two different sizes, WBL110 and WBL210.

HOLMS WEED BRUSH WBL	WBL110	WBL210
Height	2'6"	2'11"
Length	2'11"	2'11"
Range Right & Left	3'7"	6'10"
Weight (lb)	463	882
Weight with 400 l watertank (lb)	1565	1984
Recommended oil flow (min/max) US GAL	8/16	8/16
OPTIONS AND ACCESSORIES		
• Different types of brushes		

SNOW REMOVERS

Made for the toughest jobs, in the toughest environments.

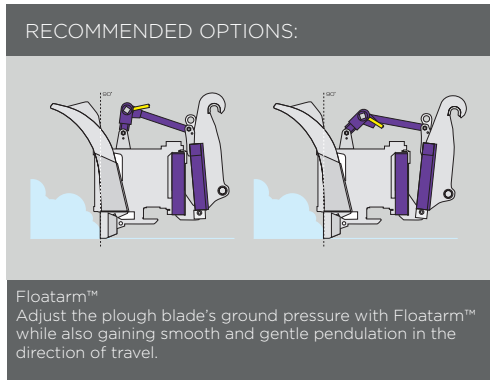

HOLMS
ATTACHMENTS

Holms V Snow Plow PV - Flared

Built for the nordic climate.

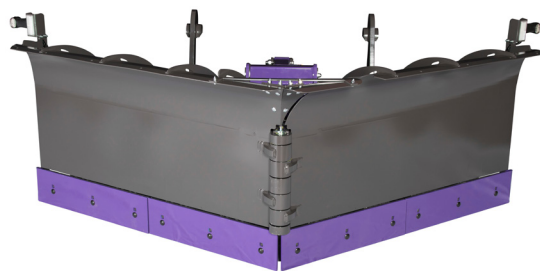

Holms latest plow is a flared V snow plow developed for the coldest climates and the highest snow drifts. With positive cutting edges and an optimal snow flow through the plow discs it effectively removes all snow. It comes in three different sizes. The wings of the plow provide an optimal snow throw over the drifts while you have good visibility in the middle of the plow. Comes in three widths: 10'6", 11'10" and 13'1".

Holms V Snow Plow PV

Folding plow for versatile and safe use in urban environments.

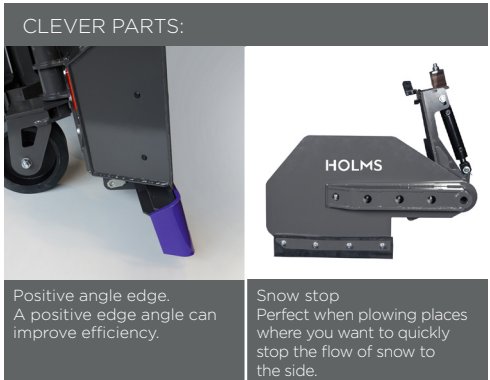

Holms V Snow Plow PV, is a folding plow is designed for snow removal in urban environments. The low guard offers better visibility and the square design enables you to get closer to buildings. The unique design makes the plow strong, light and compliant, with lower energy consumption as a result. The plow is available in two heights, 2'8" and 3'3" as well as in five different widths: 7'11", 9'2", 10'6", 11'10" and 13'1".

Holms Diagonal Snow Plow PD

The snow plow for roads and large areas.

Holms Diagonal Snow Plow PD is a plow for snow removal on public roads and in open spaces. This plow is even available with a positive angle that provides more effective snow removal at high speeds. Holms Diagonal Snow Plow PD is available in two heights and in five widths: 2'8" and 3'3". 7'10", 9'2", 10'6", 11'10" and 13'1" wide.

Holms Spreading Bucket SB

Robust spreading bucket for tractors and wheel loaders.

The Holms Spreading Bucket SB is a galvanized bucket for spreading fine materials precisely using a loader. It's designed to be used with salt mix materials for snow and ice treatment and to insure your satisfaction we provide a 3-year corrosion warranty. The integrated sifting bar and screen system meters material onto the ground while the operator controls the speed. This is a unique solution with no equal. We offer 1.30 yd³, 2.09 yd³ and 3.13 yd³ models.

Working width	4'11"	6'1"	7'1"
Max. width	5'3"	6'5"	7'4"
Max. height, excl. hooks	2'7"	2'7"	2'7"
Brush diameter	1'12"	1'12"	1'12"
Water tank volume (US Gal)	50	63	63
Effective waste volume (US Gal)	45	58	66
Weight, excl. hooks (lb)	639	672	705
Weight, full tank and container, side brush and wheels (lb)	1984	2315	2425
Oil flow, min./max. (US Gal/min)	8/16	8/16	8/16
OPTIONS AND ACCESSORIES • Side brush – right or left • Extra roller brush – for rapid brush replacement • Radio control – three different sprinkler settings		<i>All weights are approximate. Attachment weight excludes hooks.</i>	

HOLMS ANGLE SWEEPER SL	SL200	SL220	SL250	SL280
Working width	6'7"	7'3"	8'2"	9'2"
Working width, fully turned/30°	7'3"	7'10"	8'10"	9'11"
Brush diameter	2'3"	2'3"	2'3"	2'3"
Weight, excl. hooks (lb)	860	904	948	992
Weight, excl. hooks, full w.tank 106/159 US gal (lb)	2099/2637	2143/2681	2209/2725	2253/2769
Oil flow, min./max. (US Gal/min)	10/35	10/35	10/35	10/35
OPTIONS AND ACCESSORIES • Sprinkler – 105,7 or 158,5 gallons • Lift function – hydraulic lift to transport position for carrier without lift function • Connection device – for connecting/disconnecting the attachment. Requires Holms hydraulic lift function • Mount with mechanical tilt function – for carriers without a tilt function • Lateral movement – complete kit for lateral movement +/- 2.3 ft (not for sprinkler) • Swish roller brush – for rapid brush replacement • Radio control – sprinkler and angling		<i>All weights are approximate. Attachment weight excludes hooks.</i>		

HOLMS ANGLE SWEEPER SH	SH250	SH300	SH350
Working width	8'2"	9'10"	11'6"
Working width, fully turned/30°	7'3"	8'6"	9'10"
Brush diameter	3'0"	3'0"	3'0"
Weight, excl. hooks (lb)	1036	1102	1168
Weight, excl. hooks, full w.tank 106/159 US gal (lb)	2275/2813	2341/2879	2407/2945
Oil flow without flow limiter, min./max. (US Gal/min)	18/50	18/50	18/50
Oil flow, with flow limiter, full flow, min./max. (US Gal/min)	18/79	18/79	18/79
OPTIONS AND ACCESSORIES • Sprinkler – 159 US Gallon • Lift function – hydraulic lift to transport position for carrier without lift function • Connection device – for connecting/disconnecting the attachment. Requires Holms hydraulic lift function • Mount with mechanical tilt function – for carriers without a tilt function • Lateral movement – complete kit for lateral movement +/- 2.3 ft • Swish roller brush – for rapid brush replacement • Radio control – sprinkler and angling			
All weights are approximate. Attachment weight excludes hooks.			

HOLMS ANGLE SWEEPER SP	SP250	SP300	SP350
Working width	8'2"	9'10"	11'6"
Working width, fully turned/30°	7'3"	8'6"	9'10"
Weight, Standard Version (lb)	1322	1499	1675
Weight, fully equipped, w.tank 63 US Gal (lb)	1984	2160	2336
Oil flow, min./max. (US Gal/min)	18/79	18/79	18/79
Brush diameter	3'0"	3'0"	3'0"
OPTIONS AND ACCESSORIES • Sprinkler – 63 US Gallon • Radio control – sprinkler and angling • Electrohydraulic angling			
All weights are approximate. Attachment weight excludes hooks.			

HOLMS SWEEPER SC	SC100	SC150	SC200
Working width	3'3"	4'11"	6'7"
Max width	3'11"	5'7"	7'3"
Weight excl. bracket (lb)	385	447	509
Brush diameter	3'0"	3'0"	3'0"
Oil flow, 2000 motor, min./max. (US Gal/min)	11/34	11/34	11/34
Oil flow, 4000 motor, min./max. (US Gal/min)	18/50	18/50	18/50
OPTIONS AND ACCESSORIES • Screw-on mount (S40, S45, S50 and S60) All weights are approximate. Attachment weight excludes hooks.			

HOLMS BRUSH HB	HB150	HB180	HB200	HB250
Working width	4'11"	5'11"	6'7"	8'2"
Height excl. attachment bracket	1'3"	1'3"	1'3"	1'3"
Weight, excl. attachment bracket (lb)	304	350	381	460
Number of brush lines	12	12	12	12
Inner brush thickness	2.4x3.5	2.4x3.5	2.4x3.5	2.4x3.5
Outer brush thickness	3x5	3x5	3x5	3x5
Excavator mount	Yes	Yes	Yes	Yes
OPTIONS AND ACCESSORIES • Excavator mount All weights are approximate. Attachment weight excludes hooks.				

HOLMS V SNOW PLOW PV	PVL240	PVL280	PVH280	PVH320	PVH360	PVH400
Working width	7'11"	9'2"	9'2"	10'6"	11'10"	13'1"
Working width, fully turned/35°	6'7"	7'6"	7'6"	8'6"	9'10"	10'10"
Height of plow blade	2'8"	2'8"	3'3"	3'3"	3'3"	3'3"
Attachment, standard, nut and bolt	Yes	Yes	Yes	Yes	Yes	Yes
Single pendulation standard	Yes	Yes	Yes	Yes	Yes	Yes
Number of runners	2	4	4	4	4	4
Attachment, option, cotter and cotter bolt	Yes	Yes	Yes	Yes	Yes	Yes
Double pendulation option	Yes	Yes	Yes	Yes	Yes	Yes
Weight, single pendulation (lb)	1510	1708	1730	1807	1906	1962
Weight, double pendulation (lb)	1565	1763	1785	1862	1962	2017
OPTIONS AND ACCESSORIES • Snow guard – for widths 280 / 320 / 360 / 400 • Rubber runner – thickness 2.17 inches. • Support wheel or sliding discs – choose whichever best suits your needs. Wheels for widths 280-400 • Side wing – for mounting on left or right side • Electrohydraulic selector unit – for diagonal operation, radio control or wired • Snow stop – for widths 280 / 320 and 360. All weights are approximate. Attachment weight excludes hooks.						
Options for radio control • Connection kit for existing joystick – if the existing joystick has extra buttons, the connection kit can be used to connect the handset • Lever knob – when the existing third function has no extra buttons, the lever knob can be screwed onto the existing third function lever. Connects directly to the handset.						

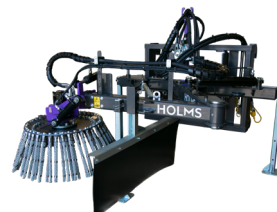

HOLMS DIAGONAL SNOW PLOW PD	PDL240	PDL280	PDH280	PDL320	PDH320	PDL360	PDH360	PDH400
Working width	7'10"	9'2"	9'2"	10'6"	10'6"	11'10"	11'10"	13'1"
Working width, fully turned/35°	6'7"	7'6"	7'6"	8'6"	8'6"	9'10"	9'10"	10'10"
Height	2'8"	2'8"	3'3"	2'8"	3'3"	2'8"	3'3"	3'3"
Number of runners	2	4	4	4	4	4	4	4
Attachment, standard, nut and bolt	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Attachment, option, cotter and cotter bolt	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Single pendulation standard	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Double pendulation option	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Weight, single pendulation (lb)	1786	2039	2150	2127	2249	2260	2370	2502
Weight, double pendulation (lb)	1841	2094	2205	2183	2304	2315	2425	2555

OPTIONS AND ACCESSORIES • Rubber runner – thickness approx. 2.16 inches • Floatarm – for simple ground pressure adjustments on the move • Adjustable support plates • Adjustable support wheels • Cotter and cotter bolt • Snow stop – for widths 280 / 320 and 360. All weights are approximate. Attachment weight excludes hooks.
